EDUCATION

Army Public School, Askari 14 ***Rawalpindi, Pakistan***
Matric (Equivalent to 10th Grade)
St. Mary's College ***Rawalpindi, Pakistan***
ICS (2nd Years College)
National University of Modern Languages ***Islamabad, Pakistan***
Bachelor in Artificial Intelligence (Expected Graduation: February 2027) GPA: 3.38

SKILLS SUMMARY

HARD SKILLS:

- **Programming Languages:** C++, Java, Python,SQL, Basics of Assembly Language
- **Machine Learning:** Logistic Regression , Decision Trees , Support Vector Machines (SVM) , Random Forest , K-Means Clustering , PCA , and Feature Scaling.
- **Natural Language Processing (NLP):** Sentiment Analysis , Text Preprocessing , Keyword Extraction , and Emotion Detection.
- **Deep Learning:** CNNs, LSTMs, ResNet-50, MobileNet, Spatio-Temporal Analysis.
- **Computer Vision:** Optical Flow, Frame Differencing, OpenCV, UAV/Drone Data Processing

SOFT SKILLS: Hardworking**,** Adaptive**,** Strong communication skills**,** Creative problem-solving

Experiences

Intern – IT Department | Fauji Foundation Jul – Aug 2026

Completed a structured summer internship in the IT Department, gaining hands-on exposure to real-world IT operations, systems, and workflows.

PROJECTS

Crowd Behavior Analysis Using CNNs and Aerial Video Signals

- **Real-Time Classification Framework**: Developed an automated surveillance system to categorize crowd dynamics into Normal, Aggressive, Panic, and Idle states using aerial video inputs.
- **Hybrid Deep Learning Architecture**: Engineered a **CNN-LSTM** network utilizing **ResNet-50/MobileNet** for spatial extraction and LSTMs for temporal sequence analysis.
- **Advanced Motion Feature Extraction**: Implemented **Optical Flow (Farnebäck)** and frame-differencing to capture complex motion vectors and crowd density metrics.
- **Dataset Management**: Curated a diverse training set from **UAV123** and **DroneCrowd** datasets, augmented with synthetic behavioral data generated via **Unity3D**.
- **Deployment & Optimization**: Integrated the model into a **Flask** and **OpenCV** dashboard, optimized for low-latency performance using **TensorRT/ONNX**.

Smart Student Feedback Analyzer (NLP)

- Sentiment Classification: Developed an NLP-based system to automatically categorize student feedback as positive, negative, or neutral.
- Text Preprocessing: Engineered a pipeline to clean raw feedback by removing noise and filler words for more accurate analysis.
- Insight Generation: Implemented keyword and emotion detection to identify specific student frustrations and satisfaction levels.

- Data Visualization: Transformed text comments into visual charts to provide instructors with fast, actionable course insights.

Face Attendance System

- **Automated Attendance Solution**: Developed a web-based system using computer vision to eliminate manual errors and proxy attendance.
- **Full-Stack Integration**: Built the application using **Flask** and **Tailwind CSS**, with **SQLite** for secure data and facial image storage.
- **Admin Management**: Implemented tools for real-time user tracking and automated attendance data export to **Excel** via **Pandas**.
- **Secure Deployment**: Utilized **Cloudflare Tunnel** to securely expose the local server for remote testing and demonstration.

Heart Disease Risk Prediction & Patient Clustering

- Engineered a predictive pipeline using Scikit-Learn to classify heart disease risk using Logistic Regression, SVM, and Random Forest models.
- Implemented K-Means Clustering and Principal Component Analysis (PCA) to segment patients into distinct risk profiles based on clinical features.
- Performed data preprocessing including mean imputation for missing values and StandardScaler for feature normalization.

LEADERSHIP EXPERIENCE

Sports President [Saint Mary's College] ***Rawalpindi, Pakistan***

- Organized and led sports events for 70+ students, promoting teamwork and leadership among peers.
- Coordinated with school administration to arrange tournaments, fostering school spirit and engagement.

Club Member National University of Modern Languages ***Islamabad, Pakistan***

- Participated in workshops and events, learning AI concepts and collaborating on group projects to develop practical solutions for real-world problems.

Project Lead | Career Development Initiative

- Spearheaded a three-member team to propose and design a comprehensive career guidance program for Computer Science students.
- Developed a technical roadmap and educational brochure focusing on emerging technologies such as AI, Blockchain, and Cloud Computing.

ACHIEVEMENTS

- NAVTTC Certified in Advance Web Application Development (A+ Grade)
- Scored 3rd Position | HEC Generative AI National Hackathon (Cohort 1) Competition, 2025(Nationwide)
- Silver Medalist in Swimming (School Level)
- 2nd Runner-Up in Chess (University Level)
- Played and led teams in football tournaments during high school.
- Skilled in multiple sports, including football, badminton, volleyball, and basketball.

LANGUAGES

- German: A1 Phase
- English: Fluent
- Urdu: Fluent
- Punjabi: Mediocre

SELF STATEMENT

As a dedicated and enthusiastic student currently pursuing a bachelor's degree in Artificial Intelligence, I am eager to explore new opportunities that challenge my intellect and foster growth. My commitment to excellence, coupled with my leadership experiences and strong academic foundation, positions me as an ideal candidate for program. I am passionate about learning and aspire to contribute meaningfully to both academic and extracurricular initiatives. I would be honored to bring my skills, creativity, and dedication to your esteemed institution.
